

PictureScape®

Step outside of square! PictureScape exhibit system allows exhibitors to create lightweight displays of nearly any shape imaginable with custom angles and curves. PictureScape enables your brand's graphics and message to stand out with an almost invisible frame and an exclusive, patented graphic connection system hidden beneath the surface for a clean brand presentation. PictureScape's fabric framing system combines anodized aluminum with stretch knit dye sub-graphics. The extruded aluminum has a proprietary channel and patented FlexLock™, which makes for a clean and finished look. For additional information, including photos and videos about PictureScape, please visit www.skyline.com/products/picturescape.

FEATURES	BENEFITS	ADVANTAGES
Unique design	Creates dynamic displays with adjustable angles and extrusion sizes.	Skyline may be the only manufacturer of this type of product that allows for angles outside of 90°.
Highly versatile design	Multiple uses with free-standing, wall attachment and rigged options.	This product is flexible as it can be reconfigured easily.
Integrated system of fabric and extrusion	Graphic and frame are both produced at Skyline for quality control on fit and finish.	FlexLock™ connection system provides easy installation, the fabric “locks” into place.
Lightweight	Lower shipping and drayage costs.	Lighter weight than traditional architectural solutions.
Quick set up	Simple Allen wrench for fast set up and dismantle.	Potential lower cost of ownership
Compact/Portable	Extrusions break down for more compact and lighter weight shipping.	Potential lower cost of ownership
