EXHIBIT SYSTEM

Skyline®

PictureScape® Exhibit System –
Custom Shaped Structures

Custom Shaped Displays for a Custom Look

Step outside of square! PictureScape® exhibit system allows you to create displays of nearly any shape imaginable with custom angles and curves. Get a unique look that complements your brand and message.

Streamlined Look

PictureScape allows your brand graphics and message to stand out with a frame that is nearly invisible and an exclusive, patented graphic connection system that is hidden beneath the surface for a clean brand presentation.

Modular Flexibility

Create unique shapes for a variety of exhibit sizes and applications – kiosks, portable displays, larger inlines and structures for island exhibits. PictureScape works with other Skyline modular systems to achieve the perfect design to meet your objectives.

Layers Add Interest

PictureScape has a slim profile so you can create interest using depth and lighting in conjunction with your graphics and still have ample room for booth staff interaction and workstations.

ANGLES

PictureScape® display accessories – shelves and literature holders – are easily repositioned to fit changing needs.

Curves

Skyline creates custom shapes – both curves and angles – in house for precision and quality.

PictureScape: Versatile and Full of Features

Simple, One-Tool Installation

PictureScape's frame assembles quickly with a simple Allen wrench.

FlexLock® Fabric Connection

Skyline's proprietary fabric connection system is concealed for a clean, professional look and allows for easy installation.

Telescoping Low Voltage Lighting

Lights position anywhere along the frame and telescope to variable lengths and angles.

Double-Sided Frames

PictureScape can carry graphics on both sides making it perfect for stand-alone kiosks in lobbies, retail settings or trade shows. PictureScape conceals wires between graphics.

Flexible to Fit Varying Spaces

Frame sections can be reconfigured to fit different booth sizes. Use sections of your larger exhibit to fit smaller spaces or add on to your smaller exhibit as you grow.

LED Ribbon Lights

Ribbon lights made specifically for PictureScape easily snap on to the frame – no tools required. LED lights are perfect for accent lighting in layered exhibit designs.

Protective Shipping Case

Most 10' (3 m) PictureScape displays, including lights and accessories, will fit in a single, soft-sided case with handles and wheels for easy transport.

Available for Rent

Exhibit infrequently? Rent your exhibit hardware now and leave future design possibilities open. Or rent additional components for a larger presence at your major show.
