

SkyTruss® Exhibit System —
Unique, Foldable Modular Truss

Structural & Efficient

Skyline SkyTruss is extremely strong so you can build big and load it up with products or presentation equipment. Unlike other truss products, SkyTruss folds flat to pack smaller and reduce operating costs like shipping, drayage and storage.

Dynamic Island Exhibits

The flexibility and strength of SkyTruss allows you to create exhibits of any design, size or shape. SkyTruss works seamlessly with other Skyline systems to provide a complete exhibit solution for your specific objectives.

Heavy-Duty Inline Exhibits

Even in smaller exhibit spaces, SkyTruss can provide a powerful presence along with all the functionality needed to reach your audience. Showcase all kinds of product, integrate flat screens for presentations, or any other needs that require structure.

“We had the best booth at the show. It was intimidating.”
– *Monster Daddy*

Multiple Shapes for Any Design

SkyTruss square and curved components are available in two sizes (11.5” and 5.75” square) and multiple lengths. Compatible connectors – square, curved and angled – allow for nearly any look imaginable.

Large Structures

SkyTruss is very strong and sturdy which allows you to build big and create a massive brand presence. It is engineered to raise hardware off the floor to open up space for client interaction.

Structural Truss Folds Flat for Efficiency

SkyTruss modular components fold nearly flat to pack small and reduce exhibit operating costs like shipping, drayage and storage. An 11 1/2” (29.2 cm) square section folds to just 1 3/8” (3.5 cm) deep.

Merchandising, Technology

Showcasing products, whatever they are, can be important to the success of your show. Design your exhibit to highlight products AND make it easy for staffers to engage, demo and sell.

SkyTruss is sturdy to support all tech needs from large screens to secure computer storage.

Brilliant, Large Format Graphics

Create a larger than life brand experience with SkyTruss and Skyline fabric graphics, which are easily installed. SkyTruss has flat surfaces so magnet-attached graphics are also easy to install and change when it's time to update your look or message.

"We wanted people to spend time and learn about our business. We wanted to emerge as the thought and innovation leader...This exhibit made the impact we wanted." — Behr Process Corp.

Functionality to Meet Your Objectives

Flat Screen Support

Engage and inform. Presentation kiosks feature flat screen support and integral wire management.

Presentations

Because SkyTruss can span long distances, and can be fitted with large format graphics, it can provide large open areas with impressive large format branded backdrops for presentations.

Magnet Attached Graphics

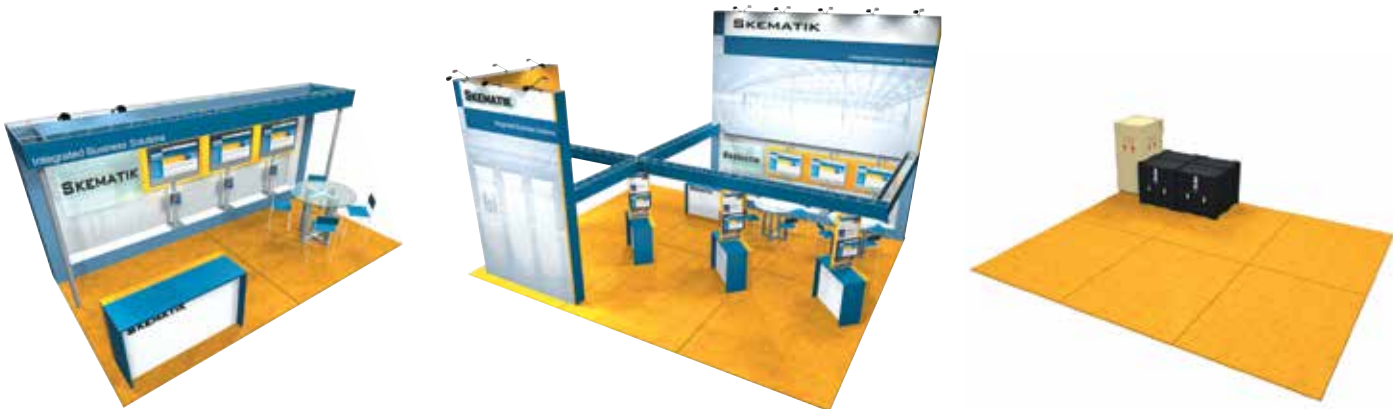

Give your marketing message interest and depth by layering sheer and opaque fabric graphics.

Available for Rent

Exhibit infrequently? Want to change your look often? Rent your exhibit hardware now and leave future design possibilities open or rent additional components for a larger presence at your major show.

“Having a premium brand image at major dental shows helped us draw some of the leading doctors in our industry. We consider that a huge success.”

– Dentsply International

Modular exhibits efficiently reconfigure to fit smaller booth spaces to give you flexibility and pack small to cut costs. This island exhibit efficiently fits in just five crates.
