

Elegant Shapes, Small Shipping

Attract attention from all over the show floor with large, lightweight hanging signs, towers and other structures. Skyline Tapestry and Fabric Structures are versatile, pack small for easy transport and are easy to install. Both feature universal connection systems, which are perfect for ceiling or tower installation and for seamless integration with other Skyline modular systems.

Tapestry for Custom Shapes

Tapestry® Exhibit System

Skyline's Tapestry has 2" diameter aluminum frames and a number of welded angle connectors for flexibility and strength. Tapestry has tubes up to 8' (2.4 m) long. Longer tubes with fewer connections are better for spanning greater distances. Skyline's in-house metal shop bends tubes to create the custom shape that's right for your design.

Skyline Fabric Structures

Dozens of standard hanging structures are available. Fabric Structures have 1 1/4" diameter steel frames up to 46" (117 cm) in length. They are easy to install **without tools** and come with opaque liners. Shapes include round, square, rectangles, disks and more (see back). Fabric Structure frames are also available for rent.

Towers, Walls and More

The custom capability of Tapestry allows you to create hanging signs, towers, walls, conference rooms and many more structures. Available accessories include light clamps, literature pockets, shelves and stabilizer feet. Tapestry easily installs with a simple Allen wrench.

Standard Tapestry shapes are available for rent to help you manage your exhibiting budget.

"The design grabs attention and gets people to come inside, giving us an opportunity to walk them through the company and our new products." — SplashTacular Entertainment

Brilliant Fabric Graphics

Skyline fabric graphics provide a superior look! Both Tapestry and Fabric Structures feature Superfecta® fabric, a high-performance stretch knit fabric that is **exclusive to Skyline**. Superfecta carries crisp, brilliant color and has a taut fit for a clean, professional look. Superfecta is durable and washable.

Seamless Integration

Engineered to work seamlessly with other Skyline exhibit systems, Tapestry or Skyline Fabric Structures can be the central part or an accent to your exhibit design solution.

"Everybody loved the design. It was exactly what we were looking for." – American Eurocopter

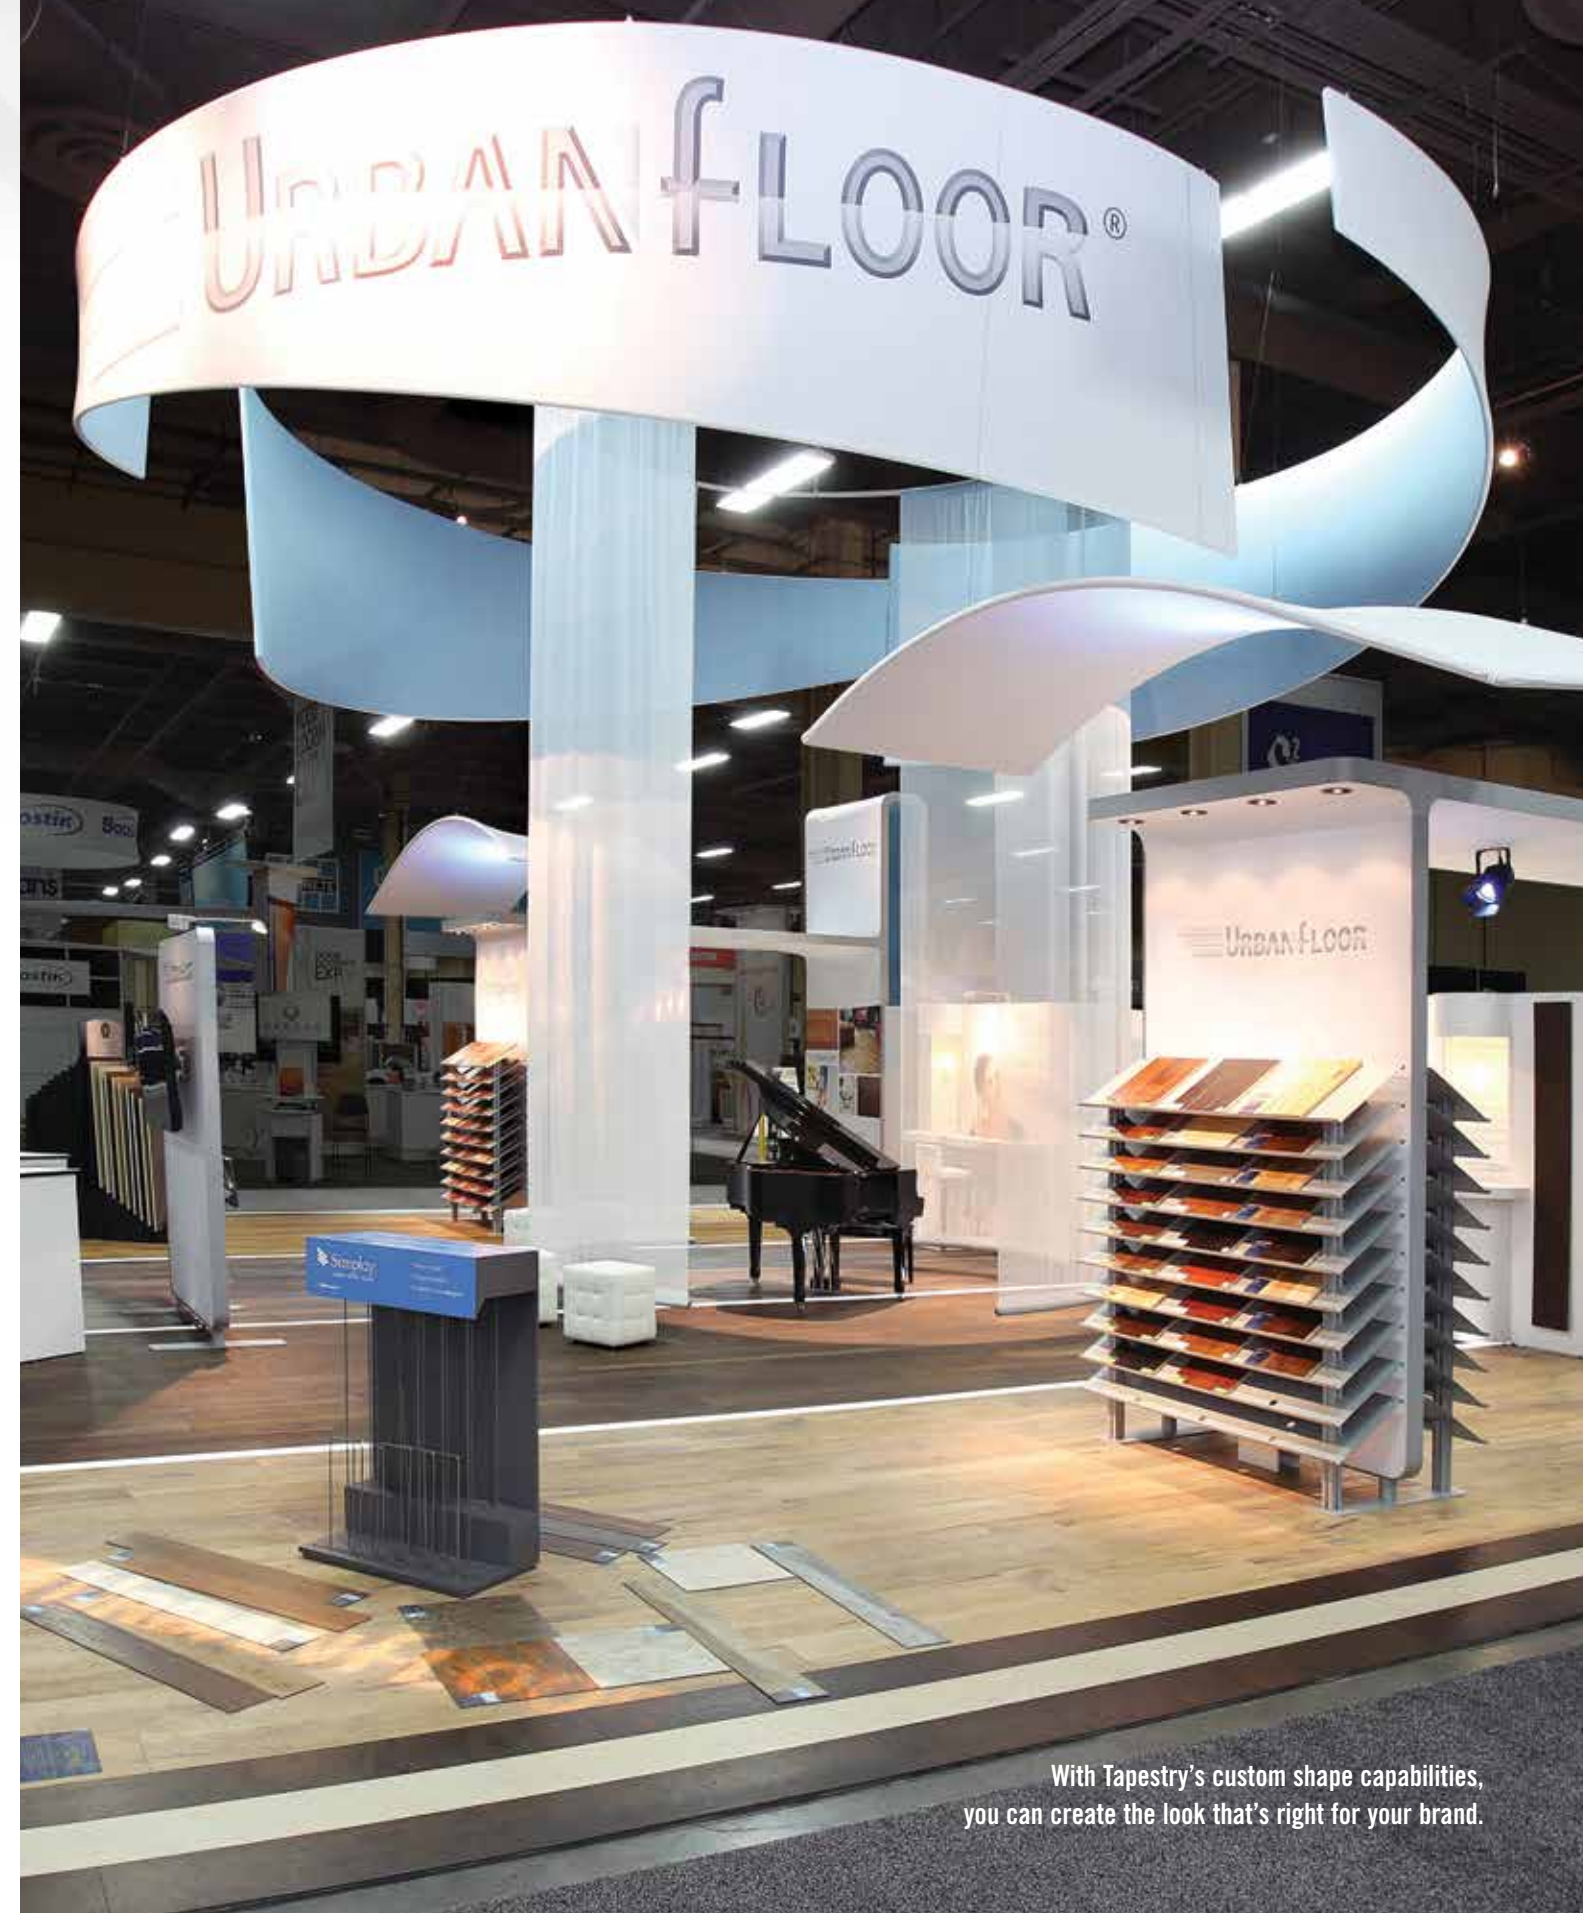

Loaded With Features

- Painted frames keep fabric clean, unlike bare metal frames
- Inner liner available for greater opacity
- Universal hanging system for ceiling or tower rigging
- Rotating motor adds movement, optional
- Standard shaped structures for rent
- Gravity ring designs provide impact at a lower cost

Easy-to-Manage Cases

Skyline Tapestry and Fabric Structures pack in cases that are easy to manage and protect your investment during storage and transport. Most standard models include a case specifically selected for each shape.

With Tapestry's custom shape capabilities, you can create the look that's right for your brand.
