Assembly

1) Place drop cloth on floor.
2) Identify bottom of frame by holes for the base plates. Indentify wire management hole in the extrusion.
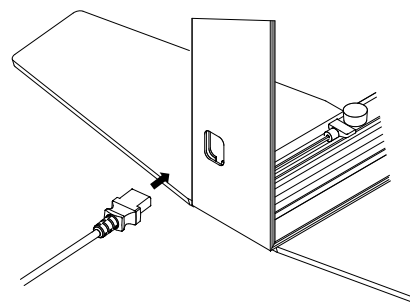

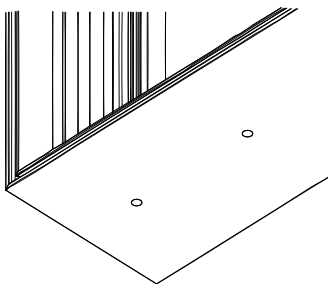

3) Assemble entire frame flat on the floor.

   a. Make sure bottom extrusions have holes for feet.

   b. Make sure verticals with power supplies are oriented with the wire management hole down near the floor. Insert accessory nut plate, if accessory supports are needed (see step 6).

   c. Tighten set screws just enough to align the set screw into the connector holes. Tighten lightly across all extrusions and repeat until set screws are evenly tightened from extrusion to extrusion. If set screws are not aligning with the recessed hole in the connectors loosen slightly and reposition the connector as needed before re-tightening.
   d. Install base plates.
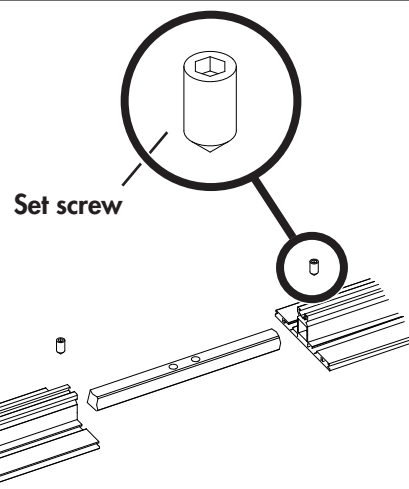

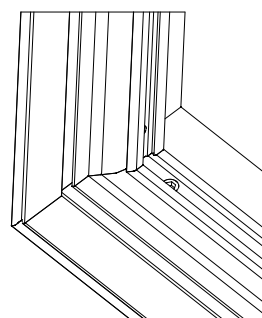

Set screw

Extrusions must contact each other squarely before tightening set screws.

Extrusions must contact each each other squarely before tightening set screws.
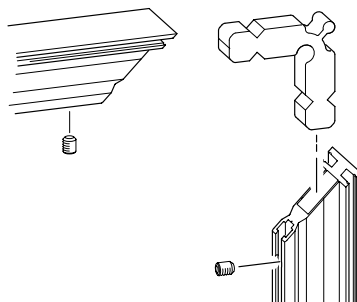

Heavy Duty base plate used on 20' frame and is not available as standard on other sizes.
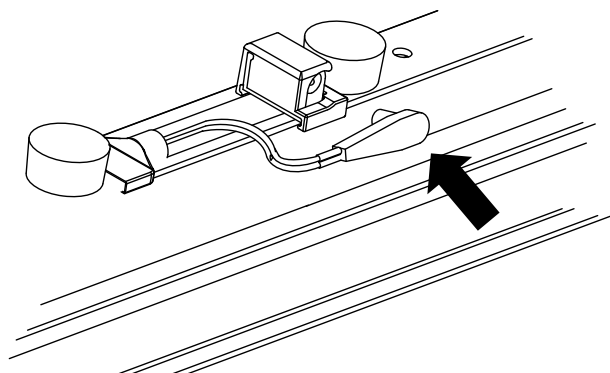

4) Snap 6 puck lights onto frame in spaces between permanent lights.

   Only remove lights with clips. Do Not unscrew lights.

page 3 of 7

PN 38331_F
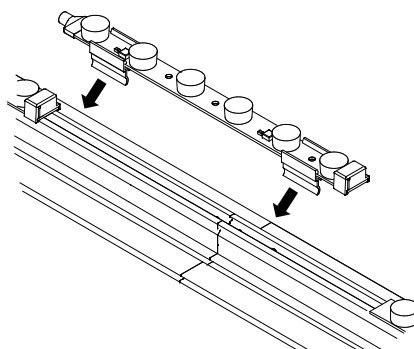

5) Connect matching lights with barrel plugs and colored flags. (Tuck wire in to prevent shadowing)

Unplug lights before dismantling the frame.

6) Assemble accessory support (This needs to be assembled before frame is assembled.)

Front with graphic

a. Slide nut plates into frame extrusion, on the backside of fame and adjust locations.

Back

b. Connect mounting bar components.

c.

Note:
Accessory bars should be installed in the opposite track as the fabric banner to eliminate shadows.
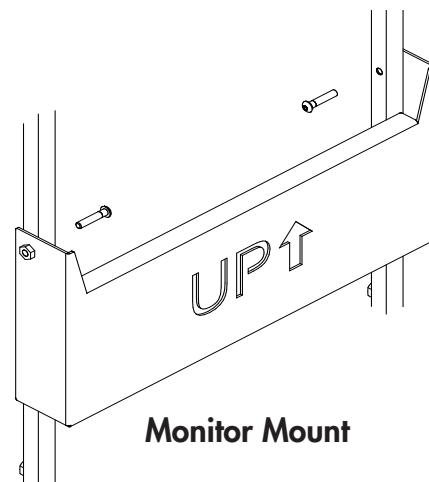

c. Screw accessory bracket into nut plate.

d.

b.

d. Snap accessory mounting bar into clips at top and bottom with the holes of the accessory bar facing side to side, not front to back.

a.

Accessory Nut Plate
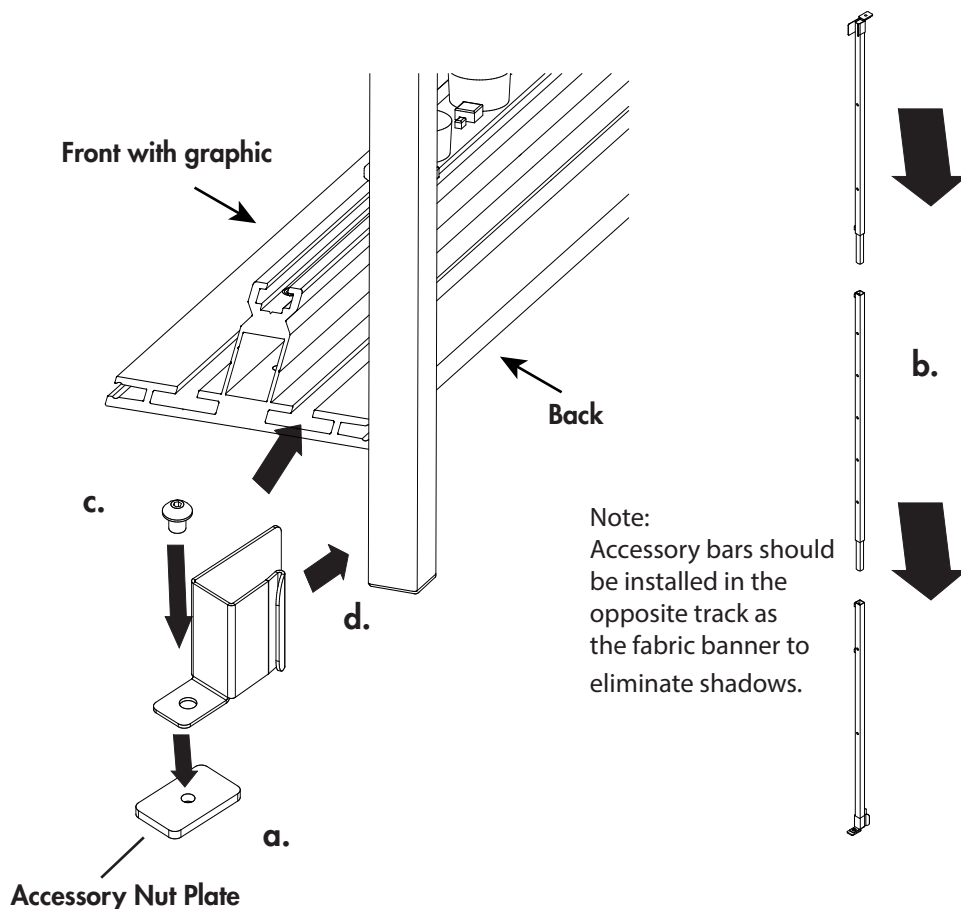

7) Secure accessories to accessory mounting bars with screws.

Skyline® *INSTRUCTIONS*

8) Connect support bar only on
   10' and 20' frames.

   a. Snap bracket into slot.
      DO NOT cover light.

   b. Snap clip over pole.

9) Connecting lights
   a. Connect wires from power
      supply to lights by matching
      colors on wires, power supplies
      and lights.
      (Reference color layout on page 1)

   b. String cord through wire slot in
      frame. Plug into bottom of the
      lowest power supply.

   c. Install wire management clips.

   d. String wires through wire
      management clip ensuring wires
      do not protrude above lights or
      into graphics.

   e. Plug jumper cords from power
      supply to light.

a.

Fabric Panel

PictureGlow
Extrusion

10) Install fabric panels. (Single sided
   light boxes: white side of light
   reflector panel faces into frame)

   a. Install 1st fabric panel.
   b. Flip over frame.
   c. Install 2nd fabric panel/or
      light reflector.
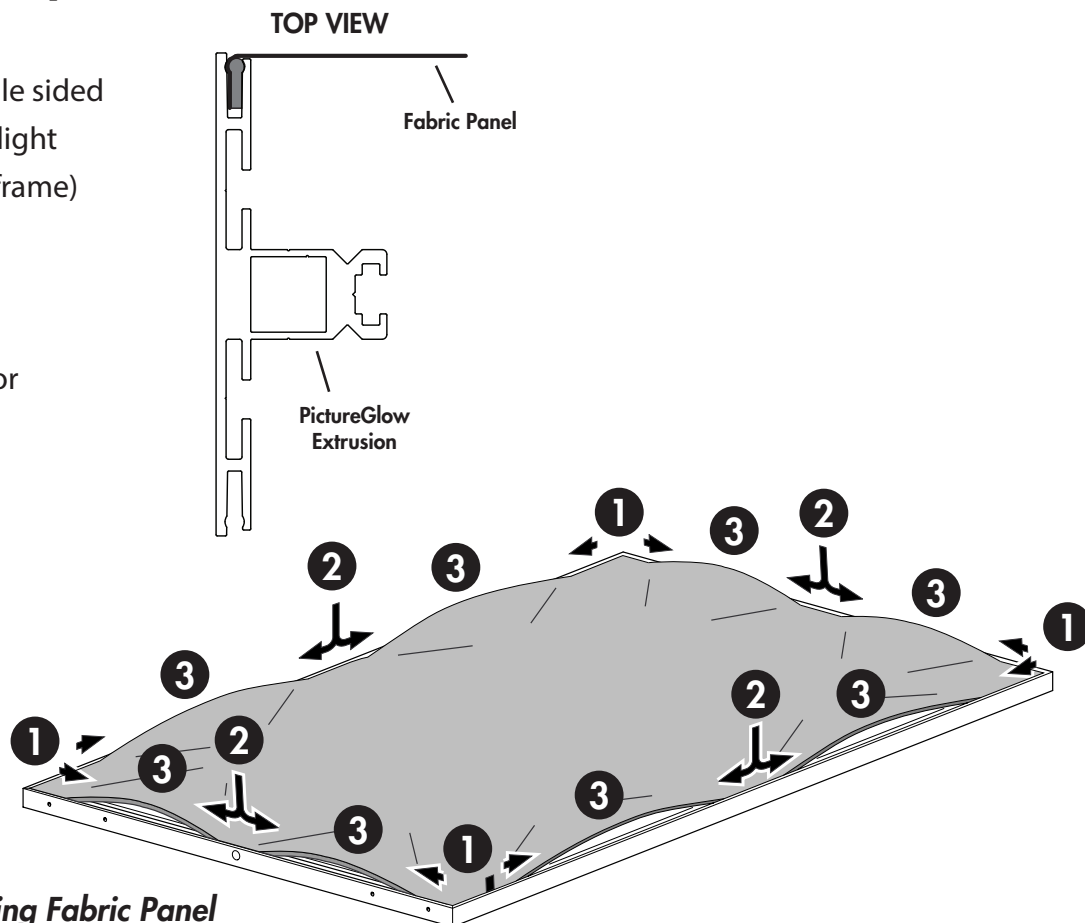

Installing Fabric Panel

1. Start at the corners of the assembly. Work the FlexLock™ edge of the panel into the extrusion at each corner.
2. Press the FlexLock™ edge of the panel into the extrusion near the middle of each extrusion.
3. Work the panel into the extrusion from the corners inward and the middle outward.
4. To Dismantle, lay frame assembly on floor covered with clean drop cloth provided. Pull tab on graphic to remove it. To help reduce wrinkling, carefully pack fabric panel and pack with core into fabric panel storage bag.

Top of graphic

Top

Bottom

Bottom of graphic

Fold banner side to side.

Place banner in plastic bag.

Packaging Graphic this way will protect your graphic and minimize wrinkles.
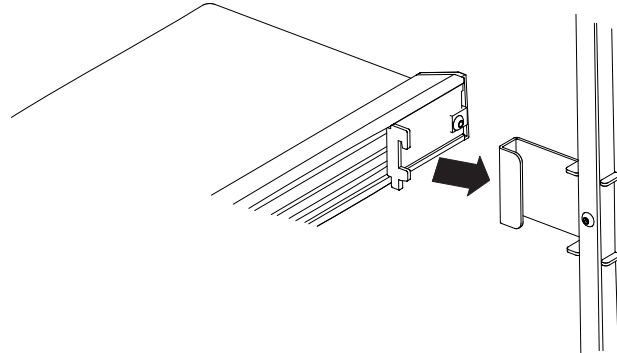

IRON OR STEAM GRAPHIC ON FRAME - ONLY AS NEEDED

PN 38331_F

11) Tip frame onto feet.

12) Install Corner Brace

3 Puck Light might need to move up, slide light to install.

Attach brace if needed to prevent lean.

Set Screws (4X)

*Brace must be installed before the weight of shelves or monitors are on the frame.

13) Attach Shelves.

14) If using monitor stand:

a. Attach monitor plate to monitor.

b. Hang monitor plate on monitor shelf.

a.

Monitor Plate attaches to the back of the monitor.
